The name film originates from the fact that photographic film also called film stock has historically been the medium for recording and displaying motion pictures. Many other terms exist for an individual motion-picture, including picture, picture show, moving picture, photoplay, and flick. The most common term in the United States is movie, while in Europe film is preferred. Common terms for the field in general include the big screen, the silver screen, the movies, and cinema the last of these is commonly used, as an overarching term, in scholarly texts and critical essays. In early years, the word sheet was sometimes used instead of screen. Film in general is not a good term to refer to a long standard commercial video production since it's ambiguous in general and therefore requires context for correct interpretation.

The impact of a reviewer on a given films box office performance is a matter of debate. Some observers claim that movie marketing in the 2000s is so intense, well-coordinated and well financed that reviewers cannot prevent a poorly written or filmed blockbuster from attaining market success. However, the cataclysmic failure of some heavily promoted films which were harshly reviewed, as well as the unexpected success of critically praised independent films indicates that extreme critical reactions can have considerable influence. Other observers note that positive film reviews have been shown to spark interest in little-known films. Conversely, there have been several films in which film companies have so little confidence that they refuse to give reviewers an advanced viewing to avoid widespread panning of the film. However, this usually backfires, as reviewers are wise to the tactic and warn the public that the film may not be worth seeing and the films often do poorly as a result. Journalist film critics are sometimes called film reviewers. Critics who take a more

academic approach to films, through publishing in film journals and writing books about films using film theory or film studies approaches, study how film and filming techniques work, and what effect they have on people. Rather than having their reviews published in newspapers or appearing on television, their articles are published in scholarly journals or up-market magazines. They also tend to be affiliated with colleges or universities as professors or instructors.

On June 5, 2020, Governor of California Gavin Newsom announced that film and television production could resume in the state beginning June 12, provided that conditions permit and approval is received from a county's public health officials.<sup>170</sup> Newsom incorporated key guidelines from the task forces report.<sup>171</sup> The next day, a group of unions including the Directors Guild of America, the International Alliance of Theatrical Stage Employees, the International Brotherhood of Teamsters, and SAG-AFTRA published a 36-page report detailing safety protocols agreed upon for union film and television productions, including regular testing of cast and crew members, closed sets, access zones, shooting limited to ten hour sessions, and all productions requiring an on-set health safety supervisor.<sup>172</sup><sup>173</sup> On February 9, 2021, it was announced that Blue Sky Studios, an animation studio which had been acquired by Disney during its purchase of 21st Century Fox, would be closed due to the economic impact of the pandemic on their business operations. The closure of Blue Sky also resulted in its cancellation of a film adaptation of *Nimona*, which was reported to be 75% complete.
